ATTN: Chemical Right-To-Know Program

Dear Administrator:

In keeping with Cytec's 1999 commitment to the EPA High Production Volume Voluntary program, attached find a robust summary and test plan for tris (4-t-butyl-3-hydroxy-2,6-dimethylbenzyl)-s-triazine-2,4,6- (1H,3H,5H)-trione (CAS # 40601-76-1). The robust summary and test plan is provided as hard copy and in pdf format.

Sincerely,

Randy Deskin, Ph.D., DABT
Director, Toxicology and Product Regulatory Compliance Department
